Stair Nosing

Guardian Aluminium Non-Slip Stair Nosing complies with Australian safety standards whilst presenting an aesthetic look for architectural design.

Our Stair Nosing is protected with a 15-20 micron anodised coating and is available in full lengths of up to 5.8m or supplied cut-to-size and pre-drilled to your requirement.

We have an extensive selection of profiles available with either silicon carbide, polyurethane or carborundum inserts, all available in a wide range of colours.

Our Stair Nosing can be installed using mechanical fixings or adhesive.

Having completed stair nosing contracts in a variety of different locations, our professional installation team knows how to get the job done effectively and efficiently. We back our stair nosing with a full product and installation warranty for your peace of mind.

About Us

Guardian Tactile Systems Pty Ltd was incorporated in March 2003 to manufacture and market high quality Tactile Ground Surface Indicators (TGSi) for the vision impaired. We have since expanded our range of products to include a comprehensive variety of stair nosing, wheel stops and braille signs.

Guardian has successfully completed over a thousand contracts in WA to supply and install on construction, renovation and infrastructure projects. All contracts fully comply with Design for Access and Mobility AS/NZS 1428.4.1:2009. We also supply products across Australia through our network of distributors.

Guardian integrated tactiles are manufactured from durable high-tech polyurethane. This product has a proven wear resistance equal to granite, is lead free and UV resistant. We are so confident our Tactile Ground Surface Indicators will withstand any natural condition that we offer a 10-year warranty.

We supply and install premium quality, heavy duty wheel stops. Our wheel stops are moulded from a tough recycled rubber designed for durability and have excellent resistance to fading, chipping and cracking.

Guardian supply and deliver a range of braille signage throughout Australia and are manufactured for internal and external use.
